

Huseyin Eren

Software Developer

Hello, I am Hüseyin. I like to research and learn new things, especially technology, so I decided to become a software developer. Since I was a student, I have participated in social activities and I still do. This helped me improve my communication, work ethics, and leadership skills.

I met programming in high school. After learning different technical skills, I decided to focus on a web career at the end of university. During my internships, I took courses on Spring Boot and focused on backend development. I worked on CRM and fintech projects. In the future, I want to be a good backend developer.

EDUCATION

COMPUTER ENGINEERING TRAKYA UNIVERSITY

2018 - 11/2022

FLORYA TEVFİK ERCAN HIGH SCHOOL SECONDARY SCHOOL

2014 - 2018

SOFTWARE SKILLS

Backend

- Java 8+, Spring Boot
- As a db, I use H2db, mysql ve postgresql.
- Mikroservis, eureka discovery, api gateway, feign client
- Scheduler, rabbitMq (batchService), redis, swagger, Jsch
- Spring data jpa, hibernate, transaction management, hql
- Postgresql, native sql, h2db, cron, jpql
- GraphQL, junit5, mockito

Frontend

- React, bff (node.js), report screen, stepped screens, crud screens with mongodb structure.
- Elk stack (elastic search, logstash, kibana)
- Socket.io, websocket
- Nextjs (front and bff pattern), middleware, typescript
- Beginner level react native

Development Tools

- Bitbucket, jira
- Basic docker, jenkins, nexus

PROJECTS

- E-commerce, spring boot microservices projesi
- CRM project, microservices, ddd pattern, spring boot
- Digital money transfer application (35+ mikroservis)
- Prepaid card systems
- VirtualPos/PF
- Open Banking, QR Code Routing System

WORK EXPERIENCE

Junior Java Developer

Finastech Technology

01/2023 - Halen

I participated in every stage of end-to-end projects and gained experience in business processes in the digital banking sector. In the projects we developed with the Agile methodology, I worked on microservices with Java Spring Boot and on the front end with BFF-NodeJS, React, and NextJS. I also participated in deployment processes and became proficient with Atlassian tools.

Junior Java Developer

Sugar Technology

09/2022 - 12/2022

After my training with the Spring Boot framework in the backend area, we developed a CRM project from scratch with microservice architecture. I gained valuable experiences in creating microservices, gateways, and communication between microservices.

Stajyer

Exedra HRTech StajOkulu

07/2022 - 09/2022

Experienced developers gave training in different areas. We could give presentations in the areas we wanted to specialize in. At StajOkulu, I had the chance to improve myself in the backend with the Spring Boot framework.

Volunteer Experience

GSB Camp Leader

2018 - Halen

I was a volunteer camp leader at GSB nature camps in more than ten cities in Turkey. I helped middle school, high school, and university students from different cities with sports, culture, and art activities. This was to support their cultural interaction and personal development.

Volunteer Experience

Software Trainer

2022- 2023

Following the principle of learning by teaching, I gave web development training to high school students, starting from the basic level to a level where they can create their own projects. I also helped those who successfully completed the training to find internships. I am still providing mentorship support for their projects.
